Professional Summary

Motivated Computer Science undergraduate (2023–2027) with a strong interest in Cybersecurity and Networking. Skilled in Linux environments, Cisco Packet Tracer network simulation, virtualization, Python scripting, and cloud computing concepts including cloud service models. Familiar with basic mobile application deployment and network security fundamentals. Seeking an internship opportunity to contribute to security or network operations while gaining hands-on industry experience and collaborating with a high-performing team.

Education

Shree Guru Gobind Singh Tricentenary University
B. Tech in Computer Science and Engineering
CGPA: 8.29

2023–2027

Project

Saathi – Voice-First AI Accessibility Agent

Python • NLP • Speech Recognition • Automation

Contributed across the full project as part of a 3-member team — personally worked on integrating speech recognition, connecting voice commands to app automation logic, and testing the end-to-end flow with elderly users.

- Designed and built a voice-controlled AI assistant to reduce the digital literacy barrier for elderly users India.

Real-Time Posture Detection System

Python • OpenCV • MediaPipe

Led the real-time feedback module within a 3-member team, responsible for translating joint angle data into instant on-screen alerts for the user.

Bullet points:

- Developed the live feedback mechanism that processed MediaPipe joint angle output and triggered posture correction alerts
- Designed alert logic to differentiate between correct and incorrect form for push-ups and squats
- Integrated the feedback layer with teammates' OpenCV video pipeline to ensure low-latency response

Technical Skills

Full Stack & Languages: HTML5, CSS3, JavaScript (ES6+), Python, C, SQL
Networking: Cisco Packet Tracer, Nmap, TCP/IP, OSI Model Fundamentals
Operating Systems: Linux (Ubuntu), Windows, VirtualBox (VM setup & config)

Tools: Git, MS Office, VS Code
Communication & Collaboration: Git, GitHub
Currently Learning: Advanced Full Stack Web Development (Institute Training), Cybersecurity fundamentals, Ethical Hacking, Mobile App Development (Android).

Certifications

• **Full Stack Web Development Program** — Enrolled in an intensive institute program focused on modern frontend & backend architectures.

Techfest Pradarshan 5.0 (Ideathon) — Selected to present the Saathi accessibility agent project to an expert evaluation panel.

Deloitte Australia Cybersecurity Job Simulation (Forage) — Analyzed web activity logs, identified suspicious vectors, and prepared incident reporting.

Hackverse 2.0 (IILM University) — Participated in a high-intensity hackathon building innovative software prototypes under strict deadlines.

SOFT SKILLS

Clear communicator • Team-oriented • Quick learner • Detail-focused
